INTERACTION NOTES

- Tap targets $\geq 44 \times 44$ pt for all interactive elements (Apple HIG)
- Stats row cells: tap $\rightarrow$ opens quick-upgrade popover (or +1 with long press)
- Bottom button row: scale(1.05) + border-strong on press; haptic feedback ok
- Condense button: disabled $\rightarrow$ enabled transitions with 400ms accent-glow fade-in
- Entity Lab modal: 280ms slide-up, ease-out cubic; backdrop fades parallel
- Stage transition: quote opacity 0 $\rightarrow$ 1 over 800ms; CTA appears at t=1500ms
- Reduce-motion preference: drop all entries, instant; keep position animations off
